

TECHNICAL DATA SHEET

PVC adhesive tape, Art. 0874 100 050/060

Technical data

Length	20m
Width	50 mm
Backing material	PVC
Colour of backing material	Silver/black
Thickness of backing material	0.185mm
Adhesive	Natural rubber
Total thickness	0.20 mm
Separating layer	-
Adhesive strength on steel	≥ 4.0 N/25mm
Tensile strength	≥ 100 N/25 mm
Elongation at break	200% to 300%
Temperature resistance	-5°C to +60°C
Processing temperature	5°C to +40°C
UV resistant	No
Resistant to weathering	good
Moisture resistant	good
Chemical resistant	good

Application

For adhering pipe insulation cut surfaces. For sealing ventilation ducts and air-conditioning ducts. For bundling and protecting.

Application

The surfaces to be adhered must be dry and free from dust, grease and silicone. To ensure proper adhesion, the tape must be sufficiently pressed onto the material to be glued.

Storage

Store at a temperature of approx. +20°C and a humidity level of approx. 50%. Ensure the product is kept dry, free from dust and away from direct sunlight and other sources of heat. When stored in compliance with the storage conditions, the tape can be kept for 12 months.
